Hiring Committee
University of Southampton
Southampton, United Kingdom

To the Hiring Committee,

I am writing to express my strong interest in the Leverhulme Doctoral Scholarship in AI-Enabled Digital Accessibility. With my background as an AI Engineer focusing on Natural Language Processing (NLP) and robust multi-modal architectures, I am deeply passionate about using AI to enhance digital media accessibility and translation.

My experience includes building complex semantic processing systems. I have utilized SBERT and PyTorch to generate robust semantic embeddings for text processing, which is highly applicable to automated translation and accessibility solutions. Furthermore, my engineering background ensures that the AI solutions I build are not just theoretical, but scalable and performant. In my previous work, I designed full-stack architectures (using FastAPI and PyArrow) capable of real-time, low-latency processing, which is essential for accessible digital media solutions.

I am highly motivated by the interdisciplinary nature of this project and look forward to contributing my technical expertise in NLP and AI to make digital media more accessible at the University of Southampton.

Sincerely,

Ismail Aissaoui
