

*Ismail Aissaoui AI Data Science Engineer*

Your Address

Dear Emilie Chouzenoux,

I am writing to express my strong interest in the PhD position at Inria, Paris, France, focusing on developing an open-source model for abdominal 3D CT imaging in oncology. As a highly motivated and accomplished AI and Data Science Engineer, I am confident that my skills and expertise make me an ideal candidate for this exciting opportunity.

My recent work on *MedicalMambaTS*, a linear-time state space model for sub-millisecond bedside inference, has allowed me to develop a deep understanding of the importance of latency processing in medical imaging. In particular, the ability to process data in real-time is crucial in oncology, where timely diagnosis and treatment are critical factors in patient outcomes. *source model for abdominal 3D CT imaging that meets the high standards required in this field.*

Furthermore, my work on *PI-DeepONet*, a 0D Windkessel Physics-Informed Operator Network *source model for abdominal CT imaging that takes into account the complex physical processes involved*

I am confident that my expertise in AI and Data Science, combined with my passion for medical imaging and oncology, make me a strong candidate for this PhD position. I look forward to discussing my application and qualifications further.

Sincerely,

*Ismail Aissaoui*
